Class XI Electives for June 2017

For classes 11-12, students are required to select four electives by choosing *no more than one subject* each from *any four of the five groups* listed below.

The full set of subjects will include English, which is compulsory, and the four electives that you select from the groups.

There will also be a compulsory General Studies course which is a school requirement.

Please note that students of class 11 are required to register their subject choices with the Council by the end of August. Once registration has been done, subject choices cannot be changed; the subjects you have chosen (together with English) will be the subjects in which you write the board examination in class 12 (ISC 2019).

(Note: The subject groupings may undergo minor changes from year to year.)

Group A: Physics, Accounts, Literature

Group B: Chemistry, Commerce, History

Group C: Biology, Economics, Computer Science

Group D: Mathematics, Environmental science

Group E: Fine Art

The school permits any combination enabled by this structure. However, students are advised to keep college requirements in mind while choosing their subjects.
